I'm not afraid
Of standing in the middle of this open space
This sunny day
Will step aside and make way for the coming rain
Whatever is waiting I am ready

So wash the mountains away
But this is where I'll stay
I'll be holdin' strong and steady
Cause I spent way too long
Running from the storm
Well not anymore
I am ready

I couldn't wait
To stand and show the world that I had
What it takes
Tried not to break
But I learned that fallin' down don't mean
You lose your way
Whatever is waiting I am ready

(Repeat Chorus Twice)

I am ready
