all the goodness packed in a can it's a retrial harvest
with a forever lifespan
a modern miracle worthy of praise you could leave it
outside for a couple more
days let it crust over 'til a good rubbery skin adds
texture to keep the juices
locked in then before long, with a bit of luck you'll be
chewing on your protein
hockey puck throw it up in the air place it in your
underwear i'm not trying to
be rude just remember - it's not really good food, it's a
term they use they're
trying to confuse, abuse us delude us into thinking
what comes in the can is
made of beef or ham packed by uncle spam for
consumption for the founction of
selling carp found on killing floors yeah, i'm a
carnivore but waste waste lost
it's meaning by concealing not revealing that it's not
really good food, it's a
term they use they're trying to confuse, abuse us
delude us into thinking smeat
smeat smeat smeat smeat smeat smeat smeat smeat
smeat smeat smeat smeat smeat
smeat smeat
