Together we can, it's easier to manage,
We must say goodbye to much people,
When I see you, when I hear you,
Don't tell me that there's no hope.

Step up onto something or you won't stand at all!
It's time to come together, it's to hear our call.
It's time they respect us, come aside and fight!

You're not without regret.
Forget our differences.
We need you in our community, your will.
We'll defeat ourselves, without the help of foes.
It's time to rise above our worries and our woes.

Step up onto something or you won't stand at all!
It's time to come together, it's to hear our call.
It's time they respect us, come aside and fight!

Believe into accept no mess.

Unite with me, may the next generation come back and
live up to us.

You're not without regret.
Forget our differences.
We need you in our community, your will.
We'll defeat ourselves, without the help of foes.
It's time to rise above our worries and our woes.

Step up onto something or you won't stand at all!
It's time to come together, it's to hear our call.

It's time they respect us, come aside and fight! [x3]
