### "Prozac Nation"

Visit "[Prozac Nation](#)" on MotoLyrics.com

Safer today to go outside your window  
Go down the stairs  
You remember the way  
New combinations you found in your letter  
Ready to fly and escape

You're off the meds and bad tranquilizers  
Keeping it down isn't your style of fun  
Taking a walk in the park by the children  
All that you want is a smile

Everybody's getting high today  
Go on and alter your mind  
Fade away  
Fade away  
Fade away

Let it go, let it go, there's no reason to stay

All that you want is some peace in the sunshine  
Far from the freaks who are on  
Staring at TV alone with no sunsets  
Time for your oranges and blues  
You're off the meds and the bad tranquilizers  
Keeping you down isn't your style of fun  
Taking a walk in the park by the children  
All that you want is a smile

Everybody's getting high today  
Go on and alter your mind  
Fade away  
Fade away  
Fade away

(Prozac, Lithium, Wellbutren, Clonapin, Xanax, Valium,  
Crack Cocaine, Heroine, Speed, X's, Hash, Pot, Effexor,  
Profexor,  
Ellexor, Jack Daniels, Jim Beam&euro;) )

Everybody's getting high today  
Go on and alter your mind

So when they lock you again  
In a white room  
Holding you down  
Antiseptic your fate  
You don't belong in a place  
Where they talk to themselves  
It's just hell

Let it go, let it go, let it  
Fade away

All you want is a smile

Let it go, let it go, let it  
Fade away

Fade away

Fade away
