Fuel to the flame

You kindle the fire of love inside me
Each time our lips meet
I'm not strong when we're alone
Your kisses make me weak

You must know how I feel
But do you feel the same
Every time you kiss me
You add fuel to the flame

My eyes light up when I see you
I burn with desire
Each time you're near
You say you'll care but still I'm not sure

But please don't ask me to love you
If you're not gonna change my name
Every time you touch me
You add fuel to the flame

This fire you started inside of me
Has reached my very soul
You're adding fuel to a flame
That's already burning out of control

When you give me your name
I give you everything
Every time you kiss me
You add fuel to the flame

Yes, every time you touch me
You add fuel to the flame
