I've waited all my life for someone just like you
And now that I found you there's nothing I can do
Just like so many others who want to be free
It's just a hopeless love affair, sweetheart, for you and me.

Chorus:

I found my way through grief and tears to make my
dreams come true
And now at last they could be real if I could just have
you
But I know that it's impossible to start my life anew
And I waited all my life for someone just like you.

I've waited all my life for someone just like you
Someone who could love me the way that you do
Your heart could be not very own, a heart that could be
true
And I've waited all my life for someone just like you.

Chorus:

I found my way through grief and tears to make my
dreams come true
And now at last they could be real if I could just have
you
But I know that it's impossible to start my life anew
And I waited all my life for someone just like you.

Just like you...
