Touching Memories

If I could reach and touch a memory
The way a memories touching me

I wish I told you then what I feel now with these
memories locked inside
But I couldn't find the words in time to save our love
from dying
How could love so young, grow old so fast while the
memories linger on
And all the things we've said when love was warm
Sounds so cold now that you're gone.

Chorus:

If I could reach and touch a memory (just) the way
one's touching me
I could still be holding love instead of memories
If I could reach and touch a memory (just) the way
one's touching me
I could still be holding love instead of memories.
