Come on right in and have a seat and mellow out
I've been wasting my time, now would you waste your
time with me?
I've just been thinking about my life and my friends
You know they help me live it, and the girls I left behind
You know it wont be long now
I can almost taste it
Heaven's little angel sent to save me from
The things I'd do to you
So, all in all I've been feeling down and out
But I keep you around
Yeah I keep you around
Cause you can't make new old friends (X4)
Yesterday I went down to the bridge over the pond
And I saw a body floating, I think I recognized his face
Its not quite like looking in the mirror once yo have
shaved
You know it's kinda wierd man, I saw him headed
nowhere
You know it wont be long now
I can almost taste it
Heaven's little angel sent to save me from
The things I'd do to you
So, all in all I've been feeling down and out
But I keep you around
Yeah I keep you around
Cause you can't make new old friends (X4)
So, all in all I've been feeling down and out
But I keep you around
Yeah I keep you around
Cause you can't make new old friends (X4)
