And you cry out that you're alone/ let me ask a question.  
How is it you fell this way? there's a million of you.  
And when the stars align tonight, we'll watch them all fall from the sky.  
Don't deny me when, I don't feel like you anymore.  
Pain, deception, the feeling I get when I know I've been had.  
The lie that you lived without me. now you will live without me.  
And you used your last wish when, you wished, "that you were never born."  
Selfish in your ways, but when you're gone I promise to mourn.  
Then we'll all get high tonight, and watch ourselves fall from the sky.  
Listen to me when, I don't feel like you anymore. no, I don't feel like you.  
Pain, deception, the feelings I get when I know I've been had.  
The lie that you lived without me. now you will like without me.  
Fame, perception, the things that you think are so important to me.  
The lie that you lived without me. now you will live without me.  
I don't know the way. no I don't..  
No I, I don't know the way. no I don't  
Pain, deception, the feeling I get when I know I've been had.  
The lie that you lived without me. now you will live without me.  
Fame, perception, the things that you think are so important to me.  
The lie that you lived without me. now you will live without me.  
The lie that you lived without me. now you will live without me.
