We've been living together but it couldn't be forever
Why are you leaving me this way
I wanna give you devotion, let me feel your emotion
Don't go away, you can make my day
You and me, a neverending scene
Don't wake me up, it's like a dream
You and me, it's gonna hold the key
We both feel to be free

You and me (you and me)
Who is getting hole of the key
(You and me) We both just need to be free
(You and me) What's a day without any fight
(You and me) What's a night when I can't hold you tight
Love is more than a game I feel inside
It is burning flame, awaking my pride
(You and me) Who is getting hole of the key
(You and me) We both just feel to be free.
You and me

Your desire is fading
I can't but waiting
You're the only one for me
You're my only desire, feel the heat of the fire
'Cause I know you're the lover I need
You and me, it's the right temptation
Love is more than fascination
You and me eternally, we both feel to be free
