girl why do you got that look on your face  
time is now girl i don't want to waste  
U shocked my eye when U stepped in the place  
i wanna get with that baby  
now there's no way i can let...  
let U get past me now baby  
i've scoped U girl now you're mine  
it's time to let, let U shine all night baby  
love girl let me take you out  
shot U around my town  
look at them starin' at U baby  
tinight girl you deserve some wine  
here's to you being so fly  
let me just let U shine now lady  
girl why do you got an empty glass in your hand  
you got your girls but do you have a man?  
i feel your vibe U look so good i can't stand  
to look your way baby  
tip the cup back long legs bare breasted  
the type of body that got my mind manifested  
lyrical potion took me at the glance when  
i see you dance  
highlights from the light from the back  
i like the way you make me feel  
got that sex appeal  
so swing it over this way tonight  
i wanna make a long stay
