Heaven. Heaven's bodies
World around make me wonder
And they say back then our universe was an empty sea
Until a silver fox enter (words I don't understand*)
and made begin to sing at some that became the world
we know

Heaven. Heaven's bodies
World around me. Make me wonder
And they say back then our universe was a cold black
egg
Until the God inside burst out and from its shattered
shell
He made what became the world we know

Heaven. Heaven's bodies

World around me make me wonder
And they say back then our universe was an endless
land
Until our ancestors woke up and before they went back
to sleep
They carved it up into the world we know

Heaven. Heaven's bodies
World around me make me wonder
And they say back then our universe wasn't even there
until a setting bang and then there was light, was
sound, was matter
and it all became the world we know

Heaven. Heaven's bodies
World around me a dance in turmoil
