(B. White/D. Dokken)

I considered all the chances that were mine
I believed they'd find solutions just in time
I believed they had more answers than I'd heard
The angels sing a different song
Strangers all around us. "Trust in me", they say
"We have got the answers, to save the world today"
I considered all the things they said
Paper plans drawn out, but never read
To save us from our darkest fears
We close our eyes and trust that time will find a way
How we trusted in you, no one knows for sure
Still it's all but over, sailing on a ship of fools
CHORUS:
Crash 'N' Burn...To live again

Up from the ashes I rise
What was clear, the tragedy
Took all my chances away
Crash 'N' Burn...To live again
Up from the ashes I rise
Only to find it's a lie
Listening to the radio, it seemed to me
Prophets selling fast cars and a dream
Send your money to us right away
There's a seat reserved for you
At the holy altar
You can live for free
In the name of his name
For eternity
CHORUS
BRIDGE
Too many words have been spoken
So many people devine
Too many questions arise from my heart
Answers I may never find...before I
CHORUS
