(CHORUS)

Delta Queen, honey, honey  
Where you been  
Delta Queen, honey, honey  
Where you been

Tell me, mister, have you seen  
The girl they call the Delta Queen  
In New Orleans

He said, I know the girl you mean  
She's singing at the Delta Queen  
Down Seventeen

And I when I saw here there  
Tell the belle slide over here  
I didn't mind the smokey room  
Or the smell of stale perfume

I only know that she  
Was made for making love to me  
Just a woman tired of being alone  
The one that I'm now taking home

(CHORUS)

She left her home in Baton Rouge  
She only had one pair of shoes  
What could she lose  
The time had come for her to chose  
Between the good life and the blues  
What could she do

Hey, I only know that she  
Was made for making love to me  
Just a woman tired of being alone  
The one that I'm now taking home

(CHORUS) 2X to fade
