Anything new gets old except my love for you it goes
on and on it's forever true
I'll forever love you oh my whole life through
Anything new gets old except my love for you

Anything new gets old except the way you smile
The tenderness of every kiss and those pretty blue
eyes
I'll forever love you there'll be no one new
Anything new gets old except my love for you

You're the only good thing to me goodbye to the blues
and misery
No more lonely nights being so blue no more lonely
hours without you
Anything new gets old...
