Anything new gets old except my love for you
It goes on and on it's forever true
I'll forever love you, oh, my whole life through
Anything new gets old except my love for you

Anything new gets old except the way you smile
The tenderness of every kiss and those pretty blue
eyes
I'll forever love you, there'll be no one new
Anything new gets old except my love for you

You're the only good thing to me
Goodbye to the blues and misery
No more lonely nights being so blue
No more lonely hours without you
