"Season Of Hope"

Visit "[Season Of Hope](#)" on MotoLyrics.com

The prophet told us long ago
A Child will come to bring us hope
A star lit up the night to show the way
For all the wise men seeking truth
The Child came as living proof
The light of all the world still shines today
In a lowly cattle stall
Love was born to save us all

It's a season of hope, a season of joy
And it all goes back to a Baby Boy
When God reached down and changed the world
forever
We can reach out, we can believe
In the power of love, we can all meet a need
And love can change the world forever
(Love can change the world)
(Love can change the world)

Behind the lights and the Christmas cheer
People try to hide their fear
Many hungry hearts are lost and cold
But we can be the light of Christ
Bring some joy to someone's life
And share the greatest story ever told
In a lowly cattle stall
Love was born to save us all

It's a season of hope, a season of joy
And it all goes back to a Baby Boy
When God reached down and changed the world
forever
We can reach out, we can believe
In the power of love, we can all meet a need
And love can change the world forever
(Love can change the world)
(Love can change the world)
Yes it can
(Love can change the world)
O ya!
Love can change the world

Love can change the world
Yes it can

We are His hands, we are His feet
Across a thousand miles, or across your street
We are His hands, we are His feet
Across a thousand miles, or across your street 2
We've got a gift,
Let's give it away
Make a difference today

It's a season of hope, a season of joy
And it all goes back to a Baby Boy
When God reached down and changed the world
forever

We can reach out, we can believe
In the power of love, we can all meet a need
And love can change the world 2
Forever
And love can change the world forever
(Love can change the world) 2
Yes it can
(Love can change the world) 2

And love can change the world
O yes forever

Love can change the world.
