Ground control searched for perfection-in-two  
For this critical outer-space probe  
They tested, selected - it's me and it's you  
Orbiting over the globe  
But procedure produced forbidden fruits  
From all this compatibility  
And I have a suggestion that perfectly suits  
Our situation to a tee -

Let loose the brakes, and we'll break free  
We'll reach escape velocity  
Let's seize the day, get away  
To the other side of the moon

The folks below, won't they be surprised  
When we let go our earthly ties  
Step on the gas, have a blast  
On the other side of the moon

We'll settle. sooner or later,  
In a crater I know  
So snug in our igloo bungalow  
Silvery moon-dust a-glitter  
In the star glow  
And we can make love oh so slow

Alone at last, so happily  
Propelling past our apogee  
The milky way lights our way  
To the other side of the moon

We'll settle. sooner or later,  
In a crater I know  
So snug in our igloo bungalow  
Not a molecule in between us  
Down the rille, I know a gin mill,  
Just a cozy cafe, where play a combo of castaways  
Run away from the delta of Venus  
AND not an earthling's seen us

Go, our merry way  
So fancy free

How could anybody know  
Where we're gonna be?  
So out of sight, on our flight  
To the other side of the moon
