Ride On

Don Williams

Doug Johnson

Album: I Turn The Page

Peggy Sue rode away last night, on a rocking horse
Straight into the pale moonlight, make believe of
course

But what's a little girl of eight
Supposed to do when she's up so late
She can't sleep 'cause it sounds like hate
Coming from her momma and daddy's room

Chorus:

Ride on, ride on
Out to where it don't hurt no more
Ride on, come on
Back to how it was before

Your momma left and your daddy cussed
All they ever seem to do is fuss, ride on

Tommy Lee's got a space machine,
He keeps it ready on the launching pad
'Cause there've been times that he has seen,
An alien invade his dad
So he heads out for the stars
Past the moon and straight to Mars
But what about the invisible scars
That come in a bottle that his daddy brings home

Chorus:

Ride on, ride on
Out to where it don't hurt no more
Ride on, come on
Back to how it was before

Your momma left and your daddy changed
You don't even know who's to blame, so ride on

Bridge:

Some people just lose control, some people hit
overload
Some people act like some people, they never thought
they'd be
So why can't we all see
The only antidote, The only way to cope
The only true hope is love

So everybody won't you,

Chorus:

Ride on, ride on
Out to where it don't hurt no more
Ride on, come on
Back to how it was before

Go ahead and test your faith
There's still a lot of hope, it's never too late

To ride on the wings of love, ride on
