There's two hundred people pushin' up daisies  
In the graveyard out back of the old Baptist church  
There were some schemers. some sinners and  
dreamers  
And not one died wishin' they spent more time at work

Chorus:  
Take it easy on yourself  
The world will keep turnin'  
With out any help  
I love you better than anyone else  
Take it easy on yourself

Leave all the old tears, the good times and lost years  
The guilt and the heartache right where they are  
I got no hard lesson just love without question  
So right now just lay down in these open arms

Bridge:  
Unhook your burden let it all fall free  
Sometimes Life's harder then it ought to be

I got no hard lesson just love without question  
So right now just lay down in these open arms
