There's a million oil rigs pumping
That black gold all over the world
Sheiks and cowboy billionaires
In limousines loaded with sparkling girls

But money can't buy happiness
Just listen to the stories they tell
All you need to really succeed in life
Is one good well

It takes one good well
Deep and ever flowing one good well
To draw from night and day
Pure and fine, it's yours and mine

And it's always enough
We've got one good well
Overflowing with everlasting love

Don't it seem kinda funny?
How people with a lot of money
Only hunger for more
You think they'd learn that money can burn

It's love that keeps the wolf from the door
Precious love lies deep inside
Hearts you can't buy and sell when the money's low
Still we know we got one good well

It takes one good well
Deep and ever flowing one good well
To draw from night and day
Pure and fine, it's yours and mine

And it's always enough
We've got one good well
Overflowing with everlasting love
We've got one good well
Overflowing with everlasting love
