Reason To Be  
Don Williams  
Album: I've Got a Winner in You

First I was love, then I came to be  
I had a heart inside of me  
and though my heart was working I found  
still there was something it had not found

So I went away hoping to see  
Maybe I'd find what's missing in me  
Knowing so well but not knowing why  
if I didn't find this something I'd die

And then I came to where I had been

I knew the first was still not the end  
What I had left was not what I found  
Because there was you, because there I found

First I was love, then I came to be  
I had a heart inside of me  
And though me heart is still part of me  
You gave my heart its reason to be
