[Gab:]

Yeah yeah [2x]

[Lateef:]

Blackalicious

Lateef the truth speaker

[Gab:]

A little somethin

[Together:]

Now if you want some you best come with a gun

You can't fuck with the tongue or the way the song is
sung

By lateef and blackalicious we keep it fat, delicious

Complete and grant your wishes

So peep the rap and listen

You can't be idle you best come trifle

But even with a rifle your stylell get stifled

[Lateef:] quick

[Gab:]

Lateef and blackalicious we coming for that dough to
get

The lyrics that we wrote again

Are sounding rather vicious beyond scientific

I'll snap like a doberman I'm unable to hold it in

I really hope you feel it, check it out

Droppin the topic and me apocaplypse

Hip hop metroplis we stalkin mcs

Don't stop this marvelous three partners

This bottomless beat has opened wideness

Invitin us inside of it's deep rhythmic enviroment

A labrynth it's violent beings just won't be silent

And higher, and higher means to a world (?)

Where all I need is prez

And that is my rent

Just by fattin the rest

Who wont admire it

Wont rule as a tyrant

Don't condone vilolence

Till the next man trys it
Don't tax no pirate
Just watch as I begin to shape your world
All mcs in the land spanked and baked and broiled
Charred and seasoned in a pan - damn
Awakened world stagnant even though they always
been there
Laggin about exposing it to the hearing impaired
establishment
Raw energy they can't be compared
Tag em then we drag them then we finshed - yeah

[Together:]
Now if you want some you best come with a gun
You can't fuck with the tongue or the way the song is
sung
By lateef and blackalicious we keep it fat; delicious
Complete and grant your wishes
So peep the rap and listen
You can't be idle you best come trifle
But even with a rilfe your stylell get stifled

[Lateef:] quick

Let it hit them
The suffocation begins your soul it gets engulfed in
The sound like it's emotion it works just like a potion
It hurts just like that's only motion gotta think about
some rules
See it can't just all be coastin
Get to get the spectrum of the wave
Whenever you know it's flowin
Got a notion and it's deep keep it growing like the
ocean don't get salty
Its just me get a dose that's instantaneous essential
constantly
Fits like a constellation glowing natrually in facts you
see the past
The future marches on triumphantly defiantly
relentlessly
If it aint one thing it's somethin something else
The instrumental that contributes to your mental health
As for most mcs we moving like a ninja that is killin ya
stealthily
Handle your bizness candidly fool we gigantic globally
locally
And organically aint nothing you gonna do that's gonna
damage me
In this currency it's tragedy we value beyond champion
originality
Is this shit that's happen

We trigger an emotional response causes you to react violently
Yeah we trigger an emotional response causes you to react violently

[Together:]

Now if you want some you best come with a gun
You can't fuck with the tongue or the way the song is sung
By lateef and blackalicious we keep it fat; delicious
Complete and grant your wishes
So peep the rap and listen
You can't be idle you best come trifle
But even with a rifle your stylell get stifled

[Lateef:] quick

[Together:]

Lateef and blackalicious is coming for that dough to get
The lyrics that we wrote again are sounding rather vicious
Now if you want some you better come with a gun
You can't fuck with the tongue
Or your ass'll get stung by lateef and blackalicious
We keep it fat, delicious
Complete and grant your wishes we move just like eclipses
You can't be idle cause even with a title
And even with a rifle your styell get stifled - yeah

[Sample:] The king is going home to get his throne
From the root to the flute that's where everything started at..
...[echo]
