(swing on down, swing on down to me) - 2x  
in the morning when the sun still shines  
the last star lingers in the pale blue sky  
that's when i know you're around  
said that's when i know you're around  
and in the evenin' when the light comes through the  
trees  
the birds sing a song as if they're singin' to me  
that's when i know you're around  
said that's when i know you're around  
i'm dreamin' if you could, swing on down, swing on  
down to me  
i wanna know if you would swing on down, swing on  
down to me  
every time i see somethin' like that... (swing on down,  
swing on down to me)  
i want you to ... (swing on down, swing on down to me)  
baby, won't you just ... (swing on down to me)

every time the rain comes out but the sun still wants to  
shout  
that's when i know you're around  
i said that's when i know you're around  
ya know all the colors, they just speak to me  
tell me stories of how it used to be when you were still  
around  
i wish you were still around  
cause i want you to swing on down  
swing on down to me  
from the clouds won't you just, swing on down to me  
baby won't you just swing on down to me  
i wanna see you today  
i want you to swing on down to me  
it's gonna feel so good  
and all the colors they tell me things  
the birds in the trees  
and the stars in the sky  
...
