Baby you sexy and you know it
Tap me on my shoulder
I roll over just to show it
Let me know you wanna pick up where we left off
I'm ready when you're ready
Come and take the rest off
If you say baby leave it on that's fine too
Whatever you say because it's something about you
That makes me wanna let my hair down
And do what I usually wouldn't do if I wasn't with you

I like the way you hold me from behind while I open the
blinds
You can see the sunshine off of my spine
You got me autumn time falling and I can't control it
It's got your name on it boy don't be afraid to hold it
And love ain't the only thing we making

When we finish i'ma make you up some grits and
bacon
Pour a glass of orange juice and i'ma bring it to you
You can hit it in the morning let me sing it to you

You can hit in the morning yeah
You can hit in the morning yeah
You can hit in the morning
The sun rising while we moaning
Baby you can hit in the morning yeah
You can hit in the morning yeah
You can hit in the morning
The sun rising while we moaning
