I take out my guitar and strum all my dreams  
It's somewhere around here I know  
Don't let me chase rainbows that don't would have an  
end  
There must be a song I can sing  
Where is the melody and where are the words where is  
the rhythm of the drum  
And where are the voices that can make my heart bring  
I know there's a song I can sing

And if I keep trying find a secret to wake me from my  
dream  
That sleeps on the footsteps of my soul  
Some day I'll hear the music that can bring my voice  
swings  
Cause I know there's a song I can sing

Yes some day I'll hear the melody and I'll find the  
words  
And I'll feel the rhythm of the drum  
And I'll listen to the voices that can make my heart  
bring  
Yes somewhere there's a song I can sing  
Yes some day I'll hear the melody...
