Come and discover  
Come and explore  
Don't have to be shy  
Be my spy, be my spy

I'm not endurance  
I'll show you my chance  
I want you to see  
There's life on play with me  
There's life on play with me

Explore me, discover me  
Reveal me, feel free  
You like what you see  
Come to play with me  
You like what you see  
Come to play with me

I want to discover  
I want to explore  
I assure not be shy  
I'm a curious spy  
And I want to know  
Come on and show  
Prove that it's true  
There's life on play with you  
There's life on play with you  
I'll explore you and discover  
I'll prove that it's true  
There's life on play with you  
We're life on play with you  
There's life on play with you  
We're life on play with you
