"Star Ferry"

Visit "[Star Ferry](#)" on MotoLyrics.com

I'm riding the star ferry again
I have been so low before
Alone just like a stone
My days grum (???), grey and cold
Just good to make me out (old??)
My days grum (???), grey and cold
Just good to make me out (old??)

But you've come back into life

I'm riding the star ferry again
I'm riding the star ferry again

I'm riding the star ferry again
The great winds will take us far
Just now i realize
Nothing really matters much
As long as you're alive
Nothing really matters much
As long as you're alive
And you kiss death goodbye

I'm riding the star ferry again
I'm riding the star ferry again
I'm riding the star ferry again
I'm riding the star ferry again
