You better believe
That your heart is not a stone
Just because you live alone
You're a solitaire
You better believe
That I'm sometimes feeling blue
Just exactly like you do
You're not alone
You better believe
You better believe
That the nothingness you feel
At times for all of us is real
You're so true
You better believe
Bliss does not just come in pairs
Love can be found everywhere
You're so sad
You better believe
You better believe
Now you're alone but you're complete
With every moment your heart beats
You're so free
You better believe
Though you've been alone so long
Not a thing about you's wrong
You're so good
You better believe
You better believe
You better believe
