Chorus:

Positive friction, under the upper crust
What does all this Hollywood really have to do with us
True grit, timeless love
There's no reason to pretend
Lets get together and become natural once again
Natural once again

There is a certain vibe, circulating in the air
Cast from all the energy that emanates from
everywhere
Ah, such a lovely truth
Beginning to unfold
It's our brothers and sisters

All coming in from the cold... Natural once again

There's a family growing
I've seen it with my own two eyes
There's something that we're all knowing
I hope it's spreading like a wild fire
Back to a place one might call home

We have our own heroes
They're dancing in the living room
We're busy, busy counting out from zero
Not one minute too soon
Back to a place one might call home
