"United By Fear"

Visit "[United By Fear](#)" on MotoLyrics.com

Step 1 - Get Me Out Of Here

Neck deep and almost drowning

Break glass in an emergency

Audition an escape plan

Your lips are delicate but your words are bruising

I lay black and blue pleading for more

Step 2 - Change Of Plan Again

Abort another mission

Stay focused on the plans we had

Let's not lose ambition

Before your star has fallen take the time to realise

That you can still make progress

We still have hope

Don't be the first one

Don't be the one who falls in

Don't be the last one

Don't be the last one

Don't be the last to fall in love

Step - 3 Find An Empty Space

Filled with numbers and equations

No sense in throwing words of hate

Let's not burn relations

Before you say it's over, take the time to realise that we
can still

Get through this, we still have hope
