There's a fire in the sky  
A minute too late  
There's tragedy and cry  
And a lot of hate  
There's a fight in the night  
No you cannot wait  
Get it on or say goodbye  
There's a lot at stake

There's so much desperation  
And only complication  
We need someone  
Who will know the truth  
There's no more time for waiting  
'cause there's no time remaining  
We need to take some action too

Grab the bull by the horns  
Grab the bull by the horns  
Grab the bull by the horns  
Get it on, get it on  
Grab the bull by the horns  
Get it on, get it on  
Last man standing  
Last man standing too  
The last man standing  
It's the last showdown for you

Take a shot in the night  
Don't look up, don't look twice  
All you got, you decide  
It's the time of your life  
Get it up, take a ride  
No more places to hide  
There's a fire in the sky  
And your very last try

Last man standing  
Last man standing too  
The last man standing  
It's the last showdown for you

Fire!  
In the night  
Fire!  
In the sky

Everybody's dead  
Everybody's wounded  
No, life isn't fair to you  
Seems it's time for revelation  
The world is simply ending  
Are there chances  
To survive it too

Last man standing  
Last man standing too  
The last man standing  
It's the last showdown for you

Grab the bull by the horns  
Grab the bull by the horns  
Grab the bull by the horns  
Get it on, get it on  
Grab the bull by the horns  
Get it on

Turn 'em down  
It's the last showdown for you  
Be there! be there! be there!
