Ive watched an ocean
Drying under my feet
And Ive scaled the cliff face
Free from gravity
Since we met weve been basking in the summer sun
I think about it every time I turn the radio on
Bah bah bah bah...
People are strange all around me
But you're not strange
But you're not strange
Since weve met weve been basking in the summer sun
I think about it every time I turn the radio on
Bah bah bah bah...
People are strange all around me
But you're not strange
But you're not strange
People are strange all around me
But you're not strange
But you're not strange
