We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
Look into my eyes for the last time
Can you read my lips
You're over time
We're only science
We're only science
We're only science
We're only science
Look into my eyes for the last time
Can you read my lips
You're over time
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
We're only science
