(Dottie West - Bill West)

With all my heart and soul I'll always love you
Although you've treated me so wrong
With all my heart and soul I'll always want you
No matter where you go or how long you're gone.

I've heard everything happens for the best
This is hard to believe, how can losing you be the best
for me
Everytime you hurt me my love grows stronger than
before
And breaking my heart only made me love you more.

With all my heart and soul I'll always love you
Although you've treated me so wrong
With all my heart and soul I'll always want you
No matter where you go or how long you're gone...
