"Is This Justice"

Visit "[Is This Justice](#)" on MotoLyrics.com

A figure of speech kills casualties tip the scales your
word against mine you say your system never fails?

Never again! words so often said were all prisoners of
this war and the dead are still dead a treaty? there's no
treaty that can right this wrong broken they're all
broken or have you forgotten?

Is this justice? the more we say the less we are heard is
this justice? the more we want to know the less we learn

More is said than done and nothings really said take a
number and step in line everyones a suspect

Protect and to serve? they hide behind the badge you
make me the criminal when you fabricate the facts
justice? there's no justice when the innocent are held
guilty this isn't freedom, this is hipocracy

Is this justice? the more we say the less we are heard is
this justice? the more we want to know the less we learn

Never again words so often said the injustice goes on
for as long as you let it a treaty? there's no treaty that
can right this wrong broken they're all broken or have
you forgotten?

The more we say, the less we are heard

Is this justice? the more we say the less we are heard is
this justice? the more we want to know the less we learn
is this justice? is this justice? is this justice? is this
justice?
