

Blackfield

"Stand Strong"

Visit "[Stand Strong](#)" on MotoLyrics.com

Need our hands, lay to rest our skeletons
Calm the nightmares of our children need our feet,
So we don't die on our knees,
So that we can fight for our liberty

Stand strong, follow your heart

Need our eyes, so that we can find, this dark cloud's
silver lie
Need our hearts, calm the aching of these scars before
we forget, who we are

I am not your memory i am not sure
That you can see passed the hate and greed
I am not your enemy

Stand strong, follow your heart

Need our hands, hold onto to what we can no
compromise! defend our sacred land

Stand strong, follow your heart stand strong
