"How Do I Get Off The Moon"

Visit "[How Do I Get Off The Moon](#)" on [MotoLyrics.com](#)

We took off like a rocket ship
To a place that wed never been
You took me higher and higher and higher
I never thought it would end
Then I woke up to find you left me behind
Now what am I supposed to do
Tell me how do I get off the moon
Tell me how do I get these stars from my eyes
And how do I get on with my life
How do I hold someone new when I can't let go of you
Tell me how do I get off the moon
I never planned on leaving
Guess you never planned to stay
And after weve come so far together
How could you just walk away
And leave me out here in this cold atmosphere
Lost without a clue
Tell me how do I get off the moon
Tell me how do I get these stars from my eyes
And how do I get on with my life
How do I hold someone new when I can't let go of you
Tell me how do I get off the moon
You made it look so easy girl
Now the least that you can do
Tell me how do I get off the moon
Tell me how do I get off the moon
