Stand by your man's waiting
When you said we're through
And you started packing everything in sight
What's that you're disconnecting?
Well, that's one thing I'm protecting
Hold on girl, that's where I draw the line

You can take the TV and my old easy chair
And that oriental rug that you adore
But wait a minute sister, don't you touch my transistor
That's the one item I fight you for

Leave me the radio
Well I'm too in to that crying love and leave and show
Well I'll get over you in stereo
Leave me the radio

[Instrumental interlude]

You cheating heart is a waving
As you drove away
I turned the dial and heard it's crying time
The signal is coming in strong
Old Hank and Buck will play on
Well they gonna help me make it through the night

Leave me the radio
Well I'm too in to that crying love and leave and show
Well I'll get over you in stereo
Just leave me the radio

I'll get over you in stereo
Leave me my radio

Leave me my radio
Leave me my radio
Leave me my radio
