Shovelling his way through the graveyard soil  
Home of the deceased repository of vermin  
Beads of perspiration are standing on his brow  
Rutting glances in his bloodshot eyes  
As he keeps on digging for the body in the ground

Taking the lid of the box a stagnant odour arises  
Revealing, creaking and grating  
The carrion of a disabled gorgon recently expired of  
Putrefaction advanced leprosy and psoriasis this  
emaciated  
Corpse shall fulfill my necrocoprolagnistic will

Gravedigger, slicing through the flesh  
Rancid stench emerging from the wound  
Ornaments necrotic utensil he dressed up in their skin  
Transvestite in extreme squatting down raping the  
corpses

Lunacy stricken he lets down his pants  
Slaveringly staring at the carcass

Gravedigger peeling of the skin  
Ranic stench emerging from the wound  
With surgical precision meticulous dissection  
He squats down raping the corpses
