I needed you to change into my everything  
You must oblige, insistent cries  
For being what I want you to  
Please substitute the attributes which blossom  
For things contrived, so I'll arrive through watching you  
Molding your profile into my face  
Toe the line... I need you to help me  
Toe the line... Don't let me get stuck in here  
Toe the line... You'll be what I couldn't be  
May you adopt this selfish plot and play the role  
You'll consummate a resting place for both of us  
Molding your profile into my face  
Toe the line... I need you to help me  
Toe the line... Don't let me get stuck in here  
Toe the line... You'll be what I couldn't be  
You'll be my intellectual  
You'll be gifted
