Alone I sit here and wonder
Three powers around me
The devil is down in her corner
As I drift away
Forging my way into the crucial time
No noise but the noise of the gun
Or perhaps the slice of your throat
I'll die in joy, when I hear you scream

I can see it now
Your face has been changed
Mauled and destroyed
It was me that was there
Savior of our time

At the next meeting
They could all wonder
About the snicker that I'd hold
Piecing together the clues I'd left

They'd never find out it was me that was there
Saviour of our time
No crucial marks
Or startling evidence
A clean get away as you saw
Your soul would burn in hell
I'd laugh at your end

I can see it now
Your face has been changed
Mauled and destroyed
It was me that was there
Saviour of our time

Then I awake, in this prison cell
I haven't moved and your still there
U.S. History has never been in this much fun
