

## **Down Low**

# **"So Long Goodbye"**

Visit "[So Long Goodbye](#)" on [MotoLyrics.com](http://MotoLyrics.com)

This song goes out to all the people who out there who have broken relationships, misunderstanding and no trust, and it goes a little something like this

So long goodbye

Are you ready? Here we go, Down Low style

Uh, uh, check it out

Many nights, I lay alone in my bed, looking back on the letter she wrote, I just read

I can't forget the moments and times I have of you, Is she save, Dear Lord, to my loneliness rules

Shall I pick up the phone and just dial'Or maybe shall I think it over, for a while?

The pain is so deep everytime in my sleep and I record it all when I weep

But now we stay distant from one another, new people in our lives that we claim as lovers

Touching her really don't quite feel the same, If you ever been in love once feelings never change

I hope one day she realises and see she could have it all if she'd stay with me

Some nights I wish I wouldn't break down and cry, but live must take its course

So long goodbyeÂ...

So long goodbye, there's no need to cry no more, so baby just dial oh dial

No need to cry, I will be back here in times of need to be by your side (C'mon)

So long goodbye (So long goodbye baby) there's no need to cry no more, so baby just dial

No need to cry (No need to cry baby), I will be back here in times of need to be by your side

Can you understand that the way that I feel or life tearing us apart for real

I wish I could playback time, but she got her life and I got mine

Before I have to go and before I die, it's a struggle to live to keep my dreams alive

But one day I swear I'm gonna reach my goal and just to be on top, without selling my soul

And maybe then we can work this out, and maybe then  
you'll understand what I'm talking about  
?cause what I do, take concentration, to keep up the  
life in steady rotation  
But one thing I want you to know in this song, I'll be  
your right to correct your wrong  
If you need me, Yo!, I'll be here by your side, to vanish  
away all your pain, So long Goodbye...

So long goodbye, there's no need to cry no more, so  
baby just dial oh dial  
No need to cry, I will be back here in times of need to  
be by your side (C'mon)

C'mon, uh  
Can't tell you why I'm leaving, Can't tell you where I'm  
going to  
Can't tell you where I'll be upon of that  
Can't tell you why I'm leaving, Can't tell you where I'm  
going to  
Can't tell you where I'll be upon of that

So long goodbye baby  
Uh, bring it back yo

So long goodbye (No need to cry baby) there's no need  
to cry no more, so baby just dial  
No need to cry, I will be back here in times of need to  
be by your side  
So long goodbye (So long goodbye baby) there's no  
need to cry no more, so baby just dial  
No need to cry (No need to cry baby), I will be back  
here in times of need to be by your side

So now you know, people have between one another,  
all the misunderstanding and it goes a little something  
like this, check it out!
