Attitude

Attitude, check everybody's got X-ray vision  
Spot a fake, walk away  
'Cause he's not worth my time, precious attention

Does it make you scared to think you stand for  
something bigger?  
Will I ever know 'til you say it with your life?

How they love each other, how they shine  
And they follow one  
We would like to know ourselves

Not your fancy talk, not your upright walk  
They're not enough, so chalk one up for love again  
Here's the same old good news  
When you love, you give and you can never lose, no  
never

Does it make you scared to think you matter in the  
bigger picture?  
But will I ever know 'til you say it with your life?

How they love each other, how they shine  
And they follow one  
We would like to know ourselves  
Ourselves

Make a believer, make a believer out of me  
Just give me a reason, give me a reason

How they love each other, how they shine  
And they follow one  
We would love to know

How they love each other, how they shine  
And they follow one  
We would like to know ourselves  
Ourselves, to know myself
