

Downset "Together"

Visit "[Together](#)" on MotoLyrics.com

I'ma let you know, check it

Drop your guard, this time I come in peace, healing
bad blood
Seeking forgiveness and love, mad hyped to squash
all beef and toy fuss
You rather turn your back but I'm asking you not to
handle it like that

Down to get right but you trip like I trip, both teams
must come clean
So hold up on your fronting, line drawn as I fight strong
This hate can't last lifelong, hyped on sights of my
tribes bond

Together, together, get together
Together, together, it never meant as much as it does
right now
Together, together, get together
Together, together, it never meant as much as it does
right now

Crews that used to be tight, lose sight
Who's right? Hopeful vocals flow from one
Who knows that blow by blows gotta go?
Can't talk it, must live it moment by moment
Future depends on present connections within my
section

Pages of ages laced with days
Split many lessons to learn from worse ones dirts
Done, bust a face, pop a grill
Na, I'ma chill, threatening enemies, entering tensions,
building

Together, together, get together
Together, together, it never meant as much as it does
right now
Together, together, get together
Together, together, it never meant as much as it does
right now

We are growing again 'cause that's just the way you
are
Dig the beginning upon a place, without ever it felt
from far
Age sustaining in peace, this mockery, your energy

You're eyes don't mean the same thing to me anymore
Your words don't mean the same thing to me anymore
Your face don't mean the same thing to me anymore
Your smile don't mean the same thing to me anymore

This day don't mean the same thing to me anymore
This words don't mean the same thing to me anymore
Your eyes don't mean the same thing to me anymore
Your words don't mean the same thing to me anymore
Anymore, anymore, anymore

Together, together, get together
Together, together, it never meant as much as it does
right now
Together, together, get together
Together, together, it never meant as much as it does
right now
