"Be Like Us"

Visit "[Be Like Us](#)" on MotoLyrics.com

Please do me a favor and stop pointing
Take down your finger and cut off mocking
We are not of your kind but this grants you
No ticket for brainless criticism
What's wrong with you - why do you criticize us?
What's wrong with you - why do you mock so much?
About this - if you just can't enjoy
Leave me alone - I just don't get your point
I'm so sick of people just searching for something they
don't like
Why can't you be like us and ease your mind?
Just listen to the music and don't you look too far
behind
Come with me - be like us
And just try to enjoy
Do you think we're like all others or

Do you mean we should do dance floor
Well, fuck you - I'm not interested
And I give a shit 'bout what your saying now
What's wrong with you - if you don't like our music
Just leave this place and don't try to force me
To adapt to you - I think you're full of shit
What's wrong with you - what's your fucking point?
I'm so sick of people just searching for something they
don't like
Why can't you be like us and ease your mind?
Just listen to the music and don't you look too far
behind
Come with me - be like us
And just try to enjoy
I am so sick of people
Of people like you!
