I need a car when I'm drivin', plane when I'm flyin'
A call takes a quarter and dime
I need a radio playin', when there's nothin' we're sayin'
And help when I falling behind
Extra rest on occasion, holidays or vacation
I need you all the time

Every beat of my heart, every thought in my head
Points straight to you, underlined in red
Every move I make, every minute of mine
I need you all the time

I need boots when I'm walkin', southern drawl when I'm
talkin'
And run, when I want to run wild
A little cash when I'm goin', some freedom for growin'
Some preachin' to keep me alive
They can build it or dream it, I can take it or leave it
But I need you all the time

Every beat of my heart, every thought in my head
Points straight to you, underlined in red
Every move I make, every minute of mine
I need you all the time

Every beat of my heart, every thought in my head
Points straight to you, underlined in red
Every move I make, every minute of mine
I need you all the time

I need a car when I'm drivin', plane when I'm flyin'
A map when there's a city to find

But I need you all the time
Yeah, I need you all the time
I need you all the time
