In the quiet of the evening  
I sing a mournful song  
As the night wind blows a low lonesome moan  
Oh she left without a warning  
My world came tumbling down  
Our love ended with the sad heartbreakin' sound

Now the blues are movin' in  
I can't help the way I feel  
What an awful price for love I've had to pay  
Never thought I'd see the day  
She'd just up and run away  
What a cold world, when the blues are movin' in

I heard her walk across the floor  
Heard the closing of the door  
And the sound of silence cut me like a knife  
She was all that I lived for  
And I'll never love again  
It's a cold world, when the blues are movin' in
