Long distance, no need to shout  
close quarters, ain't talkin out loud  
and I gotta know  
all over your open mouth  
words hang like they're just hanging out  
but I gotta know

where are you going crazy  
in your mind or in everybody's mind?

cold shoulders have run out of luck  
who knows what they're runnin from  
I gotta know  
you're holding up an endless line  
putting pressure on my precious time  
but I gotta know

where are you going crazy  
in your mind or in every inch of your body?  
say something
