"Greenhouse Effect"

Visit "[Greenhouse Effect](#)" on MotoLyrics.com

Well, there's a little somethin' that's been freakin' me
I read it in the news, I saw it on TV
It turned my little world into a total wreck
A crazy little thing called the Greenhouse Effect

It seems that the conveniences of modern ways
Cars, refrigerators, styrofoam, hairsprays
Are causin' cataclysms we did not expect
A crazy little thing called the Greenhouse Effect

CHORUS:

Chlorofluorocarbons strip away ozone
We can't seem to leave the rain forest alone
Temperatures are rising & I've now deduced
That the chickens (or turkeys) of progress have come
home to roost

Oh I always drive the freeway in a bulletproof vest
Have fiber in my diet & a blood pressure test
But this is one disaster I did not expect
A crazy little thing called the Greenhouse Effect

No thanks, ma'am. Neither paper nor plastic for me.
I brought my own woven bag. Cans here, bottles there,
newspapers here!

(chorus)

Oh people, follow me, this planet can be saved
I moved from my condo back into a cave
I've found out Mother Nature's answer to high tech
A crazy little thing called the Greenhouse Effect

Start to recycle, ride your bicycle
Let's put a hex on the Greenhouse Effect!
